PROFILE

DevOps engineer (Higher Vocational Education diploma, June 2026) who builds platforms on Kubernetes with GitOps, CI/CD and observability. During my internship I built an observability platform (Prometheus, Loki, Tempo, Grafana) with FluxCD that the company's development team uses today. My own projects are public on GitHub, with documented troubleshooting. A background in sociology and career counselling means I am used to collaborating, explaining clearly and taking ownership. Pass with Distinction in 8 of 10 courses. Looking for a junior DevOps, Platform or SRE role.

SKILLS

Kubernetes & containers: Kubernetes, OpenShift, Docker, Podman, Helm, Kustomize, k3d, kind, Ingress, RBAC, NetworkPolicy, Secrets

CI/CD & GitOps: GitHub Actions, GitLab CI, Argo CD, FluxCD, Git, GHCR, Quay.io

Infrastructure as Code: Terraform (modules, remote state, HCP Terraform, separate dev/prod environments)

Observability & FinOps: Prometheus, Grafana, Loki, Tempo, Alertmanager, Grafana Alloy, Fluent Bit, OpenTelemetry, OpenCost

Security: Trivy, SBOM, gitleaks, TLS, cert-manager, Let's Encrypt, Kubernetes Secrets, risk analysis, GDPR, ISO/IEC 27000

Linux & networking: RHEL, Bash scripting, Makefile, systemd, SELinux, firewallD, LVM, SSH, TCP/IP, DNS, NAT, Traefik

Cloud (foundational): Azure (Databricks, ADLS Gen2, VNet/NSG, RBAC, Azure CLI) • AWS (VPC, EC2, EBS, S3, RDS, IAM)

Programming & data: Python (basic), FastAPI, Flask, pytest, SQL, PostgreSQL, MySQL, Redis, MongoDB, MinIO, Power BI

Ways of working: Scrum, Kanban, ADRs and runbooks, AI assistants (Claude) for troubleshooting support

EXPERIENCE

Platform Engineer Intern (LIA) • Cloudist AB, Malmö

Jan 2026 – May 2026

- Built a GitOps-based internal developer platform for observability on Kubernetes. Five components (Prometheus, Loki, Tempo, Grafana, Alertmanager) are deployed from Git with FluxCD, and the development team uses the platform today.
- Set up staging and production with Kustomize overlays and Helm, with secure external access through Traefik, cert-manager, Let's Encrypt and authentication on every endpoint.
- Onboarded Windows servers through Grafana Alloy (push over HTTPS) and kept secrets out of Git with Kubernetes Secrets and Keeper.
- Troubleshot and documented real problems, such as Flux/Kubernetes version conflicts, a namespace stuck in Terminating, NetworkPolicy errors and CrashLoopBackOff. Wrote a 63-page thesis on the architecture.

Earlier experience

2012 – 2024

- **Founder, Syvbyrån AB** (2023–2024): ran my own consultancy in career development and data analysis.
- **Career Counsellor / Labour Market Coordinator, Alvesta and Uppvidinge municipalities** (2020–2023): created study plans for 100+ people, coordinated with the Public Employment Service, CSN and the Agency for Higher Vocational Education, and introduced Scrum and Kanban in the team.
- **Sales Assistant, Pressbyrån** (2012–2015): store operations and customer service. Nominated as one of the best salespeople in southern Sweden.

PROJECTS

Polaris AI Platform • GitOps and DevSecOps for an AI service

Sep 2026 – ongoing

- Built a GitHub Actions CI pipeline with six jobs: tests, secret scanning (gitleaks), dependency review, workflow lint, image scanning with Trivy plus SBOM, and a deploy test in a throwaway k3d cluster before publishing to GHCR.
- Deploys a FastAPI service (non-root container) with Helm and Argo CD (app-of-apps) to three environments, with manual promotion to prod. Metrics and logs flow to Prometheus and Loki via OpenTelemetry and are shown in Grafana. Cost tracking with OpenCost (FinOps) is being added.
- Automates installation and operations with Bash scripts and a Makefile. Built in my own home lab with the AI assistant Claude as support, and every bug is documented with its root cause in ADRs.

Guestbook with CI/CD and GitOps on OpenShift • Lernia

Nov 2025 – Jan 2026

- Built multi-stage images on Red Hat UBI (Go backend, Nginx as non-root) for a three-tier application with PostgreSQL and a Redis cache, configured with Secrets, ConfigMaps, PVCs and a Route.
- Set up CI/CD: GitHub Actions builds and pushes to Quay.io through a robot account and encrypted secrets, and Argo CD with auto-sync and prune deploys to OpenShift.

Terraform Kubernetes Platform • IaC and GitOps

Aug 2026

- Provisioned Kubernetes clusters with modular Terraform, separate dev and prod state in HCP Terraform, and FluxCD syncing apps from a separate repository.
github.com/arash00009/terraform-k8s-platform

Flux Observability Platform and HiveBox • public repos

2026

- The thesis stack as code (FluxCD, Traefik, LGTM) and an end-to-end pipeline: Flask API → Docker → GitHub Actions → Helm → Argo CD.
github.com/arash00009/flux-observability-platform

Cloud analytics platform on Azure and AWS • Lernia

May 2025

- Azure: VNet/NSG via PowerShell, Databricks via Azure CLI, a PySpark pipeline (medallion) and ADLS Gen2 with RBAC. AWS: VPC, security groups and S3. Documented in a 50+ page report.

EDUCATION

Higher Vocational Education Diploma, DevOps Engineer, 400 credits • Lernia

2024 – Jun 2026

- **Pass with Distinction in 8 of 10 courses:** Linux (60 cr), Container Technology and OpenShift (60 cr), Database Technology (40 cr), Cloud Technologies (40 cr), CI/CD Tools (30 cr), Information Security (20 cr), Networking (20 cr) and Project Methodology (20 cr). Pass in Internship (80 cr) and Thesis (30 cr).
- Thesis: Internal Kubernetes-based Developer Platform for Observability (GitOps, FluxCD, LGTM).

BSc in Sociology, political science track, 180 ECTS • Linnaeus University

2017 – 2020

- Quantitative and qualitative methods, data analysis and investigations. Internship at the County Administrative Board of Kronoberg, where my report is still used as a basis for decisions.

CERTIFICATES AND COURSES

Certificates: Red Hat OpenShift Administration I (DO180, 2025, 40 h) • Red Hat OpenShift Development I: Containers with Podman (DO188, 2025, 40 h) • AWS Academy Graduate – Cloud Foundations (2025) • Databricks Fundamentals Accreditation (2025)

Courses: Red Hat Academy RH124 and RH134 • Azure AZ-900 and AZ-104 (course modules, exams not taken) • IBM Big Data • MongoDB Atlas

Languages: Swedish (fluent) • English (fluent) • Dari (native)

References: Internship supervisor and teacher, available on request
