PROFILE

DevOps engineer (Higher Vocational Education diploma, June 2026, Pass with Distinction in 8 of 10 courses) who builds platforms on Kubernetes with GitOps, Infrastructure as Code and observability. During my internship I built a platform from scratch that the company's development team uses today, and the whole environment can be recreated from Git. Everything I build is on GitHub with a README, architecture decisions and documented failures with their root cause. I use AI assistants every day, with tests and security scanning deciding what reaches production. A background in career counselling means I am used to understanding needs, collaborating and explaining technical choices. Looking for a junior DevOps, Platform or SRE role.

SKILLS

Kubernetes & containers: Kubernetes, OpenShift, Docker, Podman, Helm, Kustomize, k3d, kind, Ingress, RBAC, NetworkPolicy, Secrets
CI/CD & GitOps: GitHub Actions, GitLab CI, Argo CD, FluxCD, Git (branching, pull requests), GHCR, Quay.io
Infrastructure as Code: Terraform (modules, remote state, HCP Terraform, separate dev/prod environments)
Observability: Prometheus, Grafana, Loki, Tempo, Alertmanager, Grafana Alloy, OpenTelemetry
Security: Trivy, SBOM, gitleaks, non-root containers, TLS with cert-manager and Let's Encrypt, Kubernetes Secrets, risk analysis
Linux & networking: RHEL, Bash scripting, Makefile, systemd, SELinux, firewalld, SSH, TCP/IP, DNS, Traefik
Cloud (foundational): Azure (VNet/NSG, RBAC, Databricks, ADLS Gen2, Azure CLI) · AWS (VPC, EC2, S3, IAM) · Railway
Programming & data: Python (basic), FastAPI, Flask, pytest, React, TypeScript, SQL, PostgreSQL, Redis
Ways of working: Scrum, Kanban, ADRs, runbooks, AI assistants (Claude) with review and CI checks

IT EXPERIENCE

Platform Engineer Intern (LIA) · Cloudist AB, Malmö Jan 2026 – May 2026

- **Outcome:** built an internal observability platform on Kubernetes from scratch. The development team uses it today, and the whole environment can be recreated from Git.
- Five components (Prometheus, Loki, Tempo, Grafana, Alertmanager) deployed with FluxCD, Helm and Kustomize to separate staging and production environments.
- Secure external access with Traefik, cert-manager and Let's Encrypt, authentication on every endpoint and secrets kept out of Git. Onboarded Windows servers through Grafana Alloy.
- Troubleshot and documented real failures with root cause, e.g. a Flux/Kubernetes version conflict I traced in the documentation, a namespace stuck in Terminating for 19 hours and NetworkPolicy errors. Wrote a 63-page thesis on the architecture and decisions.

PROJECTS

Polaris AI Platform · GitOps and DevSecOps for an AI service Sep 2026 – ongoing

- **Outcome:** every change is tested and security-scanned automatically before it can reach production, and prod requires manual approval.
- GitHub Actions pipeline with six jobs: tests, gitleaks, dependency review, workflow lint, Trivy with SBOM, and a deploy test in a throwaway k3d cluster before publishing to GHCR.
- FastAPI service (non-root) deployed with Helm and Argo CD (app-of-apps) to dev, staging and prod. Metrics and logs via OpenTelemetry to Prometheus, Loki and Grafana.
- Built in my home lab with the AI assistant Claude as support. I review every change, and every failure is documented with its root cause in ADRs.
  github.com/arash00009/polaris-ai-platform

GreenOps Sweden · my own web app for cloud cost and carbon footprint 2026 – ongoing

- **Outcome:** a deployed service that shows what cloud resources cost and their CO_2 footprint based on the Swedish electricity mix.
- Multilingual website in React, Vite and TypeScript and an API in FastAPI with PostgreSQL, deployed on Railway. Built with the AI assistant Claude as support.
  greenops.se

Terraform Kubernetes Platform · IaC and GitOps Aug 2026

- **Outcome:** dev and prod clusters are created and destroyed with code instead of clicks, with separate state per environment.
- Modular Terraform with remote state in HCP Terraform, and FluxCD syncing apps from a separate repository.
  github.com/arash00009/terraform-k8s-platform

Guestbook with CI/CD and GitOps on OpenShift · Lernia Nov 2025 – Jan 2026

- Three-tier application (Go, Nginx as non-root, PostgreSQL, Redis) on Red Hat UBI. GitHub Actions builds to Quay.io through a robot account, and Argo CD with auto-sync and prune deploys to OpenShift.
  github.com/arash00009/guestbook-CICD

Flux Observability Platform · the thesis stack as code 2026

- FluxCD, Traefik and the LGTM stack as a public repository, plus an end-to-end pipeline: Flask API → Docker → GitHub Actions → Helm → Argo CD.
  github.com/arash00009/flux-observability-platform

Cloud analytics platform on Azure and AWS · Lernia May 2025

- Networking and security groups via PowerShell, Databricks via Azure CLI, a PySpark pipeline and ADLS Gen2 with RBAC. Solved a CPU quota limit and documented everything in a 50+ page report.

EARLIER EXPERIENCE

Career Counsellor / Labour Market Coordinator · Alvesta and Uppvidinge municipalities 2020 – 2023

- Created study plans for more than 100 young people and adults, coordinated with the Public Employment Service, CSN and the Agency for Higher Vocational Education, and introduced Scrum and Kanban in the team.

Founder · Syvbyrån AB 2023 – 2024

- Built the website syvbyran.se and created the market analysis and marketing plan for a company offering data-driven career advice to job seekers.

Sales Assistant · Pressbyrån 2012 – 2015

- Store operations and customer service. Nominated as one of the best salespeople in southern Sweden.

EDUCATION

Higher Vocational Education Diploma, DevOps Engineer, 400 credits · Lernia 2024 – Jun 2026

- **Pass with Distinction in 8 of 10 courses:** Linux, Container Technology and OpenShift, Database Technology, Cloud Technologies, CI/CD Tools, Information Security, Networking and Project Methodology. Pass in Internship and Thesis.

BSc in Sociology, political science track, 180 ECTS · Linnaeus University 2017 – 2020

- Quantitative and qualitative methods and data analysis. Internship at the County Administrative Board of Kronoberg, where my report is still used as a basis for decisions.

CERTIFICATES, COURSES AND LANGUAGES

Certificates: Red Hat DO180 and DO188 (2025) · AWS Academy Cloud Foundations (2025) · Databricks Fundamentals Accreditation (2025)

Courses: Red Hat Academy RH124 and RH134 · Azure AZ-900 and AZ-104 (course modules, exams not taken)

Languages: Swedish (fluent) · English (fluent) · Dari (native)

References: Internship supervisor and teacher, available on request
