PROFESSIONAL SUMMARY

Newly graduated DevOps Engineer (June 2026) with hands-on experience building cloud-native platforms. Strong foundation in Linux, containers, Kubernetes/OpenShift, Infrastructure as Code (Terraform), GitOps (ArgoCD & FluxCD) and observability. Designed and implemented a complete GitOps-based Internal Developer Platform during my thesis and internship, including a full LGTM stack (Prometheus, Grafana, Loki, Tempo), and independently built a multi-environment Terraform + FluxCD platform to deepen IaC and GitOps skills. Comfortable working in the terminal, troubleshooting and collaborating in technical teams. Eager to contribute and grow in a junior DevOps, Platform Engineer or SRE role.

EXPERIENCE

Internal Developer Platform for Observability – Thesis & LIA Project | Cloudist AB / Lernia Jan 2026 – May 2026

- Designed, implemented and documented a complete GitOps-based Internal Developer Platform for observability on Kubernetes.
- Built a production-oriented LGTM stack (Prometheus, Loki, Tempo, Grafana, Alertmanager) with self-monitoring.
- Configured secure external access using Traefik Ingress and cert-manager.
- Established multi-environment strategy with FluxCD, Kustomize and Helm.
- Wrote a 63-page thesis documenting architecture, decisions and operational practices.
- Worked daily with Linux, YAML, CI/CD pipelines, container images, logging and troubleshooting.

Career Guidance Counsellor | Public sector (Sweden)

2020 – 2024

- Provided study and career guidance to young people and adults, including newly arrived immigrants and SFI students.
- Developed strong skills in communication, stakeholder coordination and structured problem-solving.

EDUCATION

Higher Vocational Education Diploma – DevOps Engineer | Lernia YH, Stockholm, Sweden Aug 2024 – Jun 2026
400 HVE credits

Bachelor of Arts in Sociology (Political Science orientation) | Linnaeus University, Växjö, Sweden 2017 – 2020

TECHNICAL SKILLS

Infrastructure as Code: Terraform (modules, remote state, multi-environment workspaces, HCP Terraform)

Linux & System Administration: RHEL (RH124/RH134), systemctl, SSH, NetworkManager, Bash, SELinux, LVM, journalctl

Containers & Orchestration: Podman, Docker, Kubernetes, OpenShift (DO180/DO188), Deployments, Services, Routes, ConfigMaps, Secrets, PVC, HPA

GitOps & CI/CD: Git, GitHub Actions, GitLab CI, ArgoCD, FluxCD, Helm, Kustomize

Observability: Prometheus, Grafana, Loki, Tempo, Alertmanager, Fluent Bit

Cloud: Azure (AZ-900/AZ-104), AWS (Cloud Foundations certified) – VPC/VNet, IAM, S3, EC2, networking & security basics

Databases: PostgreSQL, MongoDB, Redis, SQL

Networking & Security: TCP/IP, subnets, CIDR, NAT, DNS, Security Groups, TLS, cert-manager, SELinux

Tools: Bash, YAML, Git, VS Code

CERTIFICATIONS

- AWS Academy Cloud Foundations
- Red Hat OpenShift Administration I (DO180)
- Red Hat OpenShift Development I (DO188)

Curriculum Vitae

KEY PROJECTS

Terraform Kubernetes Platform (IaC + GitOps) — Aug 2026

- Multi-environment Kubernetes infrastructure provisioned via modular Terraform, with isolated dev/prod state managed in HCP Terraform.
- Integrated FluxCD for GitOps-based application delivery, automatically syncing deployments from a separate Git repository.
- → github.com/arash00009/terraform-k8s-platform

Kubernetes Observability Platform (Thesis/LIA) — Jan–May 2026

- Full GitOps setup with FluxCD, LGTM stack and multi-environment support.
- → github.com/arash00009/my-devops-thesis-project

CI/CD + ArgoCD on OpenShift

- End-to-end GitOps pipeline with auto-sync and self-healing.

Three-tier Guestbook Application

- Nginx + Golang + PostgreSQL + Redis with multi-stage builds, Secrets, PVC and HPA.
- → github.com/arash00009/guestbook-CICD

Information Security Policy & Risk Analysis — 2025

- Developed a complete information security policy including risk assessment, GDPR compliance analysis, role descriptions and recommendations based on ISO/IEC 27000 principles.
